PROFESSIONAL SUMMARY

Spanish-speaking Solutions Engineer and technical leader with 20+ years of experience spanning software engineering, developer advocacy, and enterprise customer engagement. Proven ability to translate complex technical platforms into clear, business-aligned solutions through consultative discussions, tailored demonstrations, and hands-on workshops.

Strong background in supporting enterprise customers and OEMs across Europe and Asia, acting as a trusted technical advisor during integration, adoption, and solution design phases. Combines deep engineering expertise with customer-facing communication skills to build confidence, accelerate adoption, and influence strategic technical decisions.

CORE COMPETENCIES

- Solutions Engineering & Pre-Sales Support
 - Technical Discovery & Requirements Analysis
 - Enterprise Customer Engagement
 - Technical Demos & Proof of Concept Delivery
 - API & Platform Integrations
 - Cross-Functional Collaboration (Sales, Product, Engineering)
 - Consultative Problem Solving
 - Executive & Technical Stakeholder Communication
 - Multilingual Communication (Spanish & English)
-

LANGUAGES

Spanish (Native/Fluent)
English (Fluent)
Dutch (Basic)

PROFESSIONAL EXPERIENCE

TomTom — Amsterdam, NL

Technical Program Manager – Customer Enablement Technologies

Dec 2022 – Present

- Acted as senior technical interface for international automotive OEMs, aligning product capabilities with customer integration strategies.
- Supported commercial engagements by translating customer requirements into scalable API and SDK solutions.
- Collaborated closely with Sales, Product, and Engineering teams to shape solution positioning and roadmap alignment.
- Guided architectural discussions with enterprise stakeholders to ensure long-term sustainability and performance.

TomTom — Amsterdam, NL

Developer Advocate / Technical Solutions Engineer

Apr 2019 – Nov 2022

- Led customer-facing technical engagement for enterprise and OEM clients, acting as a consultative partner during platform adoption and integration.
- Designed and delivered tailored technical demonstrations and proof-of-concepts, including executive-level demos for Mercedes-Benz and BYD.
- Conducted workshops and deep-dive sessions to align platform capabilities with customer architecture and operational workflows.
- Partnered with Sales and Product teams to support strategic deals by articulating technical value and differentiation.
- Reduced recurring integration issues by ~25% through proactive technical guidance, documentation, and solution validation.

TomTom — Amsterdam, NL

Product Owner & Senior Software Engineer

Apr 2017 – Apr 2019

- Led a cross-functional engineering team delivering backend and mobile platform capabilities.
- Translated business and customer requirements into implementable technical solutions.
- Supported solution design discussions and integration planning with internal and external stakeholders.

Early Career – Senior Software Engineer & Technical Lead

(Research In Motion / BlackBerry and related engineering roles)

- Designed and implemented mobile and backend systems used by enterprise customers and global developer communities.
- Led small engineering teams across architecture, development, testing, and release cycles.
- Built scalable, integration-ready platforms supporting third-party developers and enterprise partners.
- Contributed to patented innovations in mobile UI and application architecture.

This foundational experience established deep technical credibility that continues to inform customer-facing solution design and consultative engagements.

TECHNICAL ENVIRONMENT

APIs and SDKs • RESTful services • distributed backend systems • mobile platforms • enterprise integrations • developer platforms • cloud environments • CI/CD collaboration models
